**Leaders in Court Reporting
& Legal Technology**

ELECTRONIC EXHIBITS AND DEMONSTRATIVES:

Communicate And Advance
Your Position At Trial

SUMMARY

McCorkle Litigation Services invites attorneys and new associates to learn about highly effective trial presentation technologies. While forensic breakthroughs such as DNA and trace evidence identification have rightly grabbed the public's attention, computer-driven technologies have had a substantial impact on the effectiveness and ease of trial presentation. Electronic exhibits and demonstratives have become two key components of that strategy. Our experienced instructors will teach attendees best practices for using influential imagery and electronic exhibits.

An open happy hour will follow in McCorkle's suites so you have time to continue conversations and meet others!

Experience Level: Basic-Intermediate
MCLE Credit: 1.00 IL PR MCLE Credit (pending approval)
